Summary

Full stack engineer with a focus on JavaScript and React.

Skills

Test me on: **ES6, CSS/SASS, HTML, JavaScript, React, Redux, Typescript, Git**
Let's talk about: **.NET, NextJS, Vue/Vuex, MongoDB, PostGres, Wordpress, NodeJS, SQL**

Experience

Junior Software Engineer   Insider Intelligence   Dec. 2020 - Present
- Wrote the foundation for current reusable component library in adherence to **atomic design**.
- Maintained and spun up microservices **using React, NextJS, Redux, .NET, MongoDB**.
- Worked with clients/ internal stakeholders to form product decisions.
- Improved performance and **SEO** of public facing applications.
- Headed certain epics by estimating, grooming, delegating and scoping stories.

Software Engineer Intern   Streamforge   Aug. 2020 – Dec. 2020
- Designed and developed "game-like" features for our streamer growth platform using **Vue/Vuex, Sequelize**, and **NodeJS**.

Front End Development Intern   SavingTakeouts   Jul. 2020 – Aug. 2020
- Prototyped and developed custom **Wordpress** themes using **Figma, PHP, HTML/CSS, JS**.
- Developed custom functionality for an ecommerce site on top of **WooCommerce**.

Software Engineer Intern   Netsmart Technologies   Jun. 2019 – Aug. 2019
- Worked on a reporting interface utilizing **SSRS' SOAP API, .NET, Angular2+.**

IT Intern   NYC DEP   Jun. 2017 – Aug. 2018
- Developed CRUD dashboards for internal budgeting using **Angular2+, .NET Core, SQL**,

Projects

- BobaBeware – basic roguelike browser game using **Phaser.io** created for my game dev class. Based off a popular drink, it highlights custom hand-made sprites, 2D engine, an AI controlled monster, randomized floors, and a cutscene engine.
- Colleges4Me – a knockoff college application CRUD app for my database class using **React** and **Express**. Features search filtering, analytics using Nivo chart library (**d3**), and algorithmic-based recommendations,

Education

Bachelor of Computer Science   Stony Brook University, 2020
